CIA agents identified

WASHINGTON — A periodical dedicated to exposing CIA operations yesterday identified 11 more alleged CIA operatives and their assignments in Europe and Asia. Covert Action Information Bulletin is the brainchild of former CIA agent Philip Agee, who left the agency in 1969 after 12 years to write exposes on the agency. The January issue names seven persons said to be working in CIA jobs ranging from station chief to telecommunications experts in US diplomatic missions in Pakistan, Brazil, Lebanon, Egypt, the Philippines and Greece. It also names four other alleged agents transferred to posts in the Philippines, France, Italy and Britain.
